

FLOATING SHELF INSTALLATION

Shelf with internal magnets

Shelf Bracket

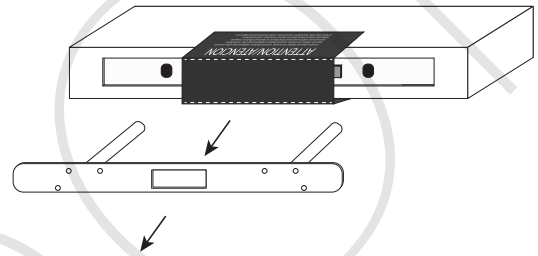

x6
Screws

REMOVE BRACKET

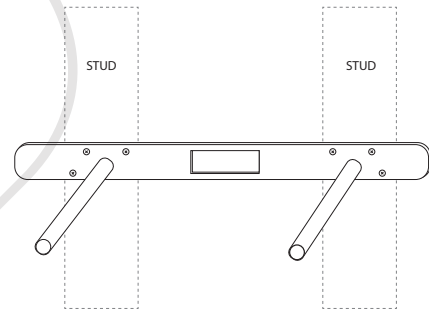

Remove mounting bracket from shelf and remove black card within.

Do not reinsert the bracket into the shelf until the final step, as the internal magnet is strong and will make the bracket difficult to remove from the shelf.

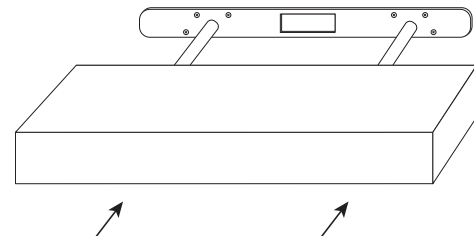

MOUNT BRACKET

Position and level bracket. Mount bracket to wall using provided screws, ensuring screws penetrate studs or backing.

INSTALL SHELF

Slide shelf onto metal bracket, pressing firmly to engage magnet.

NOTE: Images above are for instructional purposes only. Actual product may differ in size and style.
